

1- Firebase account + linked billing account + Activating reCAPTCHA | What does this mean?

- [reCAPTCHA | Google for Developers](#)

- "**Pay** as you **go**" means the system will deduct the amount due from your topped-up wallet. If there aren't enough funds, it will deduct the amount from THE card linked to the **billing account** .

• Maybe will be cost on :

1. activating the Two-factor auth
2. File and Videos and Photos cloud storage
3. High amount of Users

2- LLM API key – DeepSeek or OpenAI or Claude or Gemini

3- WhatsApp business account , the API key you can take it from META .

4- GLM Coding plan for **faster** the Process of development : [GLM Coding Plan — AI Coding Powered by GLM-5 & GLM-4.7 for Agents & IDEs](#) , **MAX** or **Pro** tire .

5- For hosting , I will use **Vercel Hosting** , in the future we may need to upgrade to higher plan if the Users increased .but normally no cost .

6- CSV OR **Excel** file include basic info about the Employees like , NAME , PHONE NUM ,etc. | I need this because I am going to design a system where, when the administrator uploads the file, the system automatically extracts the employees you want to send tasks to from the file without the need to enter them manually.
